WEBSITE STRUCTURE AND PLANNING

4.1 SITE MAP

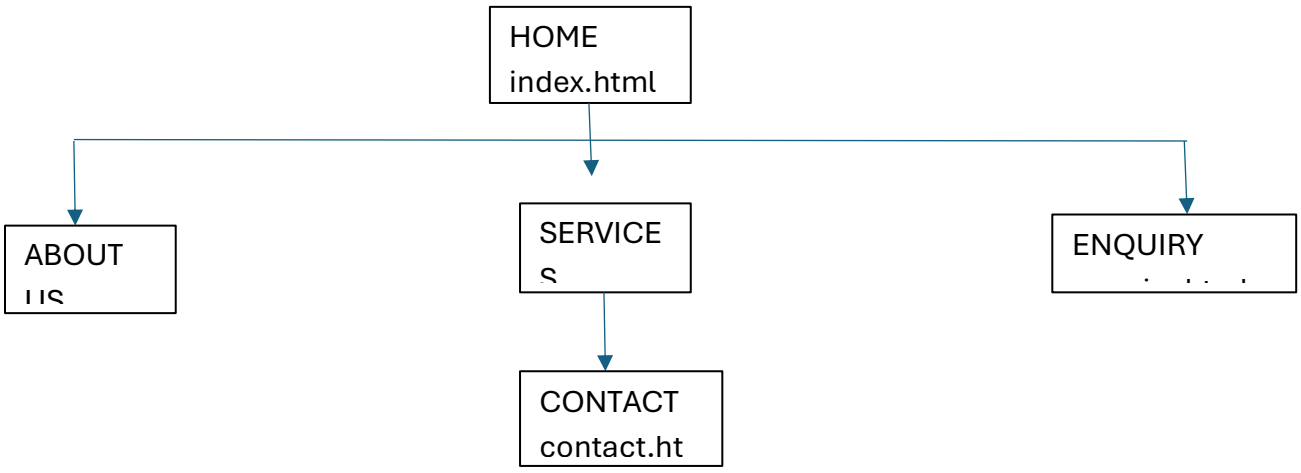
The proposed Mashadi's Braids website will consist of five main pages: Home, About Us, Services, Enquiry and Contact. The sitemap will provide a clear representation of the website structure and show the relationship between the different pages.

The **Home page (index.html)** will be the main landing page of the website. It will introduce Mashadi's Braids, display a suitable hero image and provide links to the main sections of the website.

The A**bout Us page (about.html)** will provide information about Mashadi's Braids, including the background, purpose and information about the business.

The **Services page (services.html) w**ill provide detailed information about the hairstyles and braiding services offered by Mashadi's Braids. Photographs and relevant service or pricing information will be included where applicable.

The **Enquiry page (enquiry.html)** will contain a form that allows customers to make enquiries about hairstyles, services and appointments.

The **Contact page (contact.html)** will provide the business contact details, location information, map and contact form.


The website will use a consistent navigation menu so that visitors can easily move between the main pages.
